

KTR-Shop with new functionalities

4/2011

We have optimised our Shop for you! Not only the design is new, but also the following functions such as:

- Full-text search
- Tracking & Tracing / tracking the consignment
- Online delivery notes
- Online invoices

You will appoint the SuperUser within your company performing the user administration in your company. This function allows you to generate and delete users and restore code words. We are pleased to set up this function for you, if requested.

The user's manual shows all functions in detail.

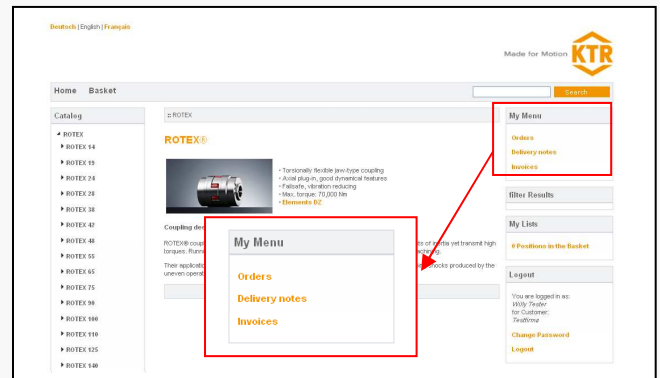

The new KTR-Shop will be implemented on 6th June, 2011.

Now as before you can reach our KTR-Shop via our website or directly via <https://shop.ktr.com>.

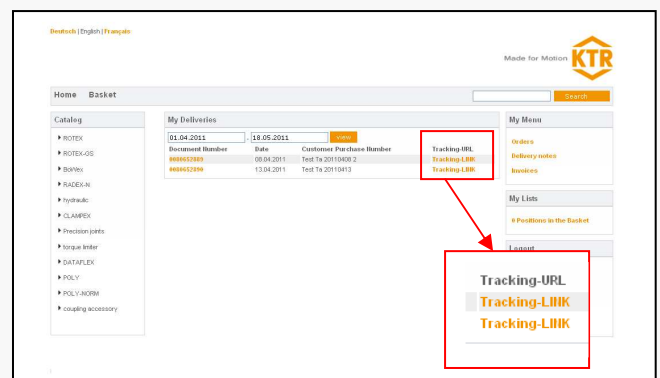

It is not necessary for you to re-register, since your well-known log-in data continue to be valid.

Apart from the new functions we continue to offer you the following features:

- Ordering from the KTR catalogue
- Ordering from the KTR selection programs
- Screen for fast entry
- Input via in-house material numbers
- Access data for every user
- Summary of your orders
- Language selection German, English, French

Your „Personal Menu“ allows you to access all your orders, deliveries and invoices.

The function „Delivery notes“ included in your personal menu directs you to the tracking of the consignment. Here you can find out whether your consignment has already left your company and where it is situated at the moment.

For any questions and suggestions about the new KTR-Shop, please contact Mr. Hönscher. He will be pleased to assist you in every respect:
